Road Construction Report

Road Construction: The District has determined that water used for road construction and maintenance is considered de minimis use. This allows owners of high capacity regulated wells to supply water for road construction and maintenance, at no loss of allocation to the landowners as long as the proper procedure and documentation is followed. The **landowner** is responsible for notifying the District and approval is required prior to allowing the withdrawal of any water from a regulated well. If the District is not notified and approval not received, all water pumped will be considered allocated water. The following must be reported to the District:

Applicant (Landowner): _____

Address: _____ City, State, Zip: _____

Telephone: _____ Email: _____

County: _____ Contact Name: _____

Legal description of road for which construction/maintenance is requested: (Aerial Photograph is recommended) _____ 1/4 _____ 1/4 Section _____ Township _____ N Range _____ W

Estimated number of gallons needed: _____ Type of well: _____

Legal description of well: _____ 1/4 _____ 1/4 Section _____ Township _____ N Range _____ W

Well registration number: _____ GPM of well: _____

Type of flowmeter: _____ Flowmeter serial number: _____

Time frame water is expected to be needed: _____

Planned process for accounting for water use: (flowmeter) (electric use) (estimate)
