Crop Water Use Report for the week of September 9th 2019

Over the past week, corn used 1.54 inches.
Expected use by corn for this week is 1.43 inches.

In the past week, beets used 1.27 inches.
Expected use by beets for this week is 1.18 inches.

Over the past week, potatoes used 0.14 inches.
Expected use by potatoes for this week is 0.13 inches.

Over the past week, dry beans used 0.42 inches.
Expected use by dry beans for this week is 0.39 inches.

Over the past week, soybeans used 1.26 inches.
Expected use by soybeans for this week is 1.17 inches.

Over the past week, sunflowers used 1.61 inches.
Expected use by sunflowers for this week is 1.5 inches.

Over the past week, alfalfa used 1.4 inches.
Expected use by alfalfa for this week is 1.3 inches.

In past week, actively growing lawns used 1.4 inches.
Expected use by actively growing lawns for this week is 1.3 inches.

In the past week average ET gage readings were 1.4 inches.

The average rainfall for the district was 0.6 inches.

The weather forecast for the next week shows highs being in the 70's and 80's with lows in the 50's. There is a chance of thunderstorms early this week.

In the last week soil moisture monitoring station 1 showed 72% water available at 12", 57% water available at 24", and 65% water available at 36". The producer did irrigate. Remember this is in a **Sandy Loam** soil type with **Corn** planted and will vary depending on site specific; weather, irrigation management, topography, management practices, crop, and soil type.

In the last week soil moisture monitoring station 2 showed 61% water available at 12" and 59% water available at 24". The producer did not irrigate. Remember this is in a **Loam** soil type with **Dry Beans** planted and will vary depending on site specific; weather, irrigation management, topography, management practices, crop, and soil type.

The crop water use report is completed using the average growth stage for each crop and ET gage reading from across the district. To find the conversion for your specific crop growth stage visit <https://nawmn.unl.edu/GrowthStageData>

For more information or to inquire about ET gages or soil moisture monitoring equipment, please contact Maria Baglieri at the Upper Niobrara White Natural Resources District at 308.432.6190 or visit our website at www.unwnrd.org. We are committed to helping Nebraskans conserve and protect groundwater.

CORN
